**ATCO STRUCTURES EXPANDS U.S. MANUFACTURING OPERATIONS  
Addition of 140,000 Square Foot Facility in Wichita Falls, Texas Boosts Capacity**

**CALGARY, Alberta** – ATCO Structures Inc., a world leader in the construction and supply of modular buildings, will expand its' manufacturing facilities in the United States at a 140,000-square foot plant in Wichita Falls, Texas. Financial terms were not released.

“The Wichita Falls manufacturing facility is expected to begin production in the second quarter 2006 and initially create at least 50 local jobs with the capacity to significantly grow the workforce over time,” said Harry Klukas, President, ATCO Structures. ATCO Structures currently operates seven manufacturing facilities in Canada, South America, Europe, Australia, and the United States.

“Through this expansion, ATCO Structures will be better positioned to effectively serve new and existing customers in major U.S. and international markets,” added Mr. Klukas, noting the new facility is only 330 miles from the company’s existing plant opened in 1999 in Diboll, Texas. The new facility in Wichita Falls was previously used for manufacturing mobile and modular housing.

From the two facilities, ATCO Structures (USA) Inc. will supply innovative modular buildings ranging from single stand-alone buildings to custom designed complexes, supported by a full range of services including design and engineering, transportation, maintenance and after sales service.

ATCO Structures Inc., part of the ATCO Group of Companies, has manufactured, sold and leased workforce housing and modular buildings since 1947 in more than 100 countries. The ATCO Group is a worldwide organization of companies engaged in Power Generation, Utilities, and Global Enterprises, which includes Industrials, Logistics, Energy Services and Technologies.

The ATCO Structures website can be accessed at [www.atcostructures.com](http://www.atcostructures.com).
